

# PB SERIES

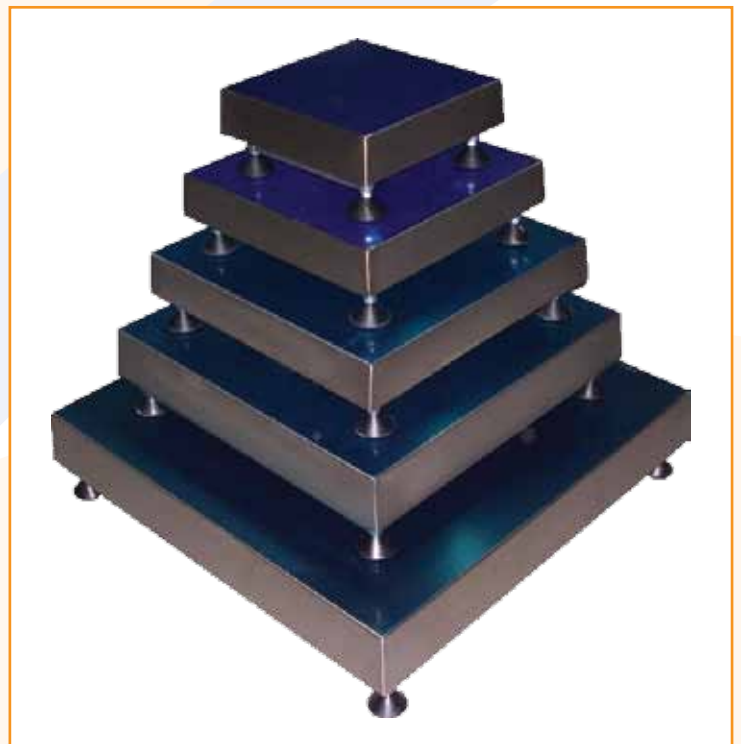

High Performance Platform Baseworks

## FEATURES

The PB Series provides high-performance weighing for the toughest of environments. It is designed specifically for use in the food processing and chemical industries because of its self-draining under-structure and its ability to be washed down. The basework resists high humidity, high pressure wash-downs, and damage from corrosive agents.

The PB Series utilises a single-point loadcell for optimum performance and recovery from overloading. The loadcell itself is resistant against cleaning agents and corrosives frequently found in food preparation and processing industrial environments.

Model	Platform Size (mm)	Maximum Weighing Capacity (kg)					
Square Weighing Platform							
PB-MS (Mild Steel)	300 x 300	15	30	60			
	400 x 400		30	60	150		
	500 x 500		30	60	150		
PB-S (Grade 304 Stainless)	600 x 600			60	150	300	
	800 x 800				150	300	600
Construction	PB-MS: Mild Steel Basework, Grade 304 Stainless Steel Platter. PB-S: Grade 304 Stainless Steel Basework, Grade 304 Stainless Steel Platter.
